Research Computing Training

Courses run by IT Services

The following courses are scheduled for summer 2017:

- Introduction to NVivo

If the course you are interested in is fully booked please add your name to the waiting list; this will help us to gauge demand and to offer additional courses if possible.

Other courses held regularly include:

- Introduction to YARCC
- Introduction to the Linux Shell
- Introduction to Programming
- Programming with Python
- MATLAB Online Training

Postgraduate Wednesdays

Research computing sessions are sometimes held as part of the PG Wednesdays scheme - check the Postgraduate Wednesdays programme for up-to-date details. No need to book - just turn up!

Courses run by other departments

- Bioinformatics courses

Spare Seats in Lecture Courses

Departments are encouraged to allow postgraduates and postdocs from any department to attend certain of their lecture courses on computing topics, if there is spare capacity in the lecture room. This is for interest only - not for credit - but may enable you to get some additional training.

Modules on offer for 2016/17:

- Department of Mathematics

Any departments wishing to advertise spare places here should contact Lorraine Moor.

General IT Training

- IT Services

General Training for Researchers

- Learning and Development
