University of York training resources

Research Computing Training

Courses run by IT Services

A range of IT courses is on offer for 2020-21, including those listed below. For further information and to book a place, please go to the Learning Management System (for staff) or Skillsforge (for PGR students).

- Introduction to NVivo
- Introduction to Programming
- Introduction to Programming with Python
- Essential Surveys
- Essential Spreadsheets
- Essential Access
- MATLAB Online Training

Digital Skills Training

Coding training sessions are available from time to time under the Digital Wednesdays programme, which is open to all staff and students. For further details, see:

- Digital Skills Training

Coding Club runs regular talks and seminars on technical topics, from version control and unit testing to CPU architecture and bioinformatics. For more information see:

- Coding Club

Courses run by other departments

- Biology Technology Facility courses
- Maths Skills Centre courses

Spare Seats in Lecture Courses

Departments are encouraged to allow postgraduates and postdocs from any department to attend certain of their lecture courses on computing topics, if there is spare capacity in the lecture room. This is for interest only - not for credit - but may enable you to get some additional training.

Any departments wishing to advertise spare places here should contact Lorraine Moor.

General Training for Researchers

- Learning and Development
